Pros:

- Alternative Text: All images, including the Pepsi logo and the hero image, include descriptive alt attributes.
- Single Column Layout: The 600px table layout ensures top to bottom reading, which is the most accessible way to structure an email.

Accessibility cons (Areas for Improvement):

- Contrast False Positive: WAVE flagged a Very low contrast error because it cannot see the dark background image. While the text is readable to the human eye.
- Missing Page Title: The report shows an error for a "Missing or uninformative page title." This means the <title> tag doesn't exist. (fixed)
- Layout Table Alert: The tool flagged my use of a table for layout.Which is necessary for email layout but is quite old if used for other scenarios.

HW3 Applying Responsiveness and Table Based Design to Email with HTML and CSS

Start Assignment

Due Friday by 7pm
Points 100
Submitting a website url

- Create of copy of your hw2. Rename it to comp-584-hw3-yourintials.
- Add a button(s) to your email. Explore the different approaches and see which fits best for your design.
  - Make sure the button(s) aligns to the center of your page. `aria`
    `*aria-level="1"*`
  - Add some additional spacing around the button to make it easier for people to click on. `aria`
    `*aria-level="1"*`
